

Art for Design Lovers

Cityscape

Friends of Wilson

The urban landscape abstracted

Cityscape is a stimulating reduction of archetypal aerial city views. The series reflects the orderly grid patterns that surface from the sometimes seemingly disorder of our urban environments. Organised chaos.

Made from hand assembled, die cut 100% wool felt components, Cityscape is a unique and distinctive artwork that creates a compelling addition to any commercial or residential space.

Thought-provoking works with sound absorbent qualities that inspire ideas and stimulate creativity.

Our artwork series are composed of layers of 100% wool felt, a tactile and naturally sound absorbent material.

All artworks are framed, can be ordered individually and come in two standard sizes. Hang them as pairs, in a triptych, in a block of four or as solo pieces.

Product details

Size: 500x500x25mm

Frame: slate or yellow lacquered metal
